DWP-210 Tractor Feed - Availability Status.....	2

TANDY...
Clearly Superior™

PRODUCT NEWS

The following information is provided by Technical Support,
Computer Customer Service, and Computer Merchandising.

DWP-210 TRACTOR FEED (26-1443) - AVAILABILITY STATUS

The DWP-210 Tractor Feeds did arrive in the warehouse and the stock was depleted filling back orders. Another shipment should arrive in June. TEW is still accepting back orders with customer names and addresses.

TANDY 1000 VIDEOTEX PLUS (25-1150) - CANCELLATION

Videotex Plus for the Tandy 1000 was cancelled because the Telecom program included with Deskmate performs most of the functions which were to be included with Videotex Plus. A "mid-range" communications package will be released later this summer. For now, refer customers to the communications packages available through Express Order Software: Telecommuter (90-0210), Teleterm (90-0250), and Omniterm 2 (90-0270).

TANDY 2000 VIANET (25-1220) AND TANDY 1000/1200 HD/IBM PC VIANET (25-1221)

Remember that ViaNet Products consist of hardware and software. Along with the recent drop ship of demo hardware (which used demo software shipped in a separate package), some customer back orders were shipped. This hardware does not have customer ready software and should not be delivered until software is available. Arrangements will be made to ship the missing software to the respective stores when it is released.

EXPRESS ORDER SOFTWARE

XENIX PRECEDENT (90-0240) - KNOWN BUG

When the program tries to return to the main menu (LASMENU.COB) after printing the "Attorney Fee and Cash Proration" report, the program crashes. According to the vendor, this is a known bug; they are working on a fix. In the meantime, this does not damage the data - the report has been completed and it is all right to proceed with running the program (remove operator lock if you have one).

EXPRESS ORDER SOFTWARE PRODUCT AVAILABILITY

The following is a complete list of EOS 90-series numbers for Computer Software. The date under STATUS is when you can expect TEW to ship a new order.

NOTE: These products are listed in alphabetical order by product title.

T = Tape Program

D = Disk Program

As indicated by the name, "Grapevine", this section is where Customer Service Representatives share information with each other. It is here you can communicate your latest findings and "bits of wisdom" to all CSR's. If you wish to contribute to the CSR Grapevine use the Submission Form attached to the last Update of each month, or send your information to CompuServe ID number 70007,535. Please be sure to include your Name and Store Number.

NOTE: We attempt to separate fact from fiction but not being omniscient we may occasionally goof. If so, let us know about it. We'll gladly correct ourselves.

WARNING: The information contained in the CSR Grapevine is made available on an "as is" basis for the use of store personnel only. Much of the information will not be supported by Computer Customer Service and in no way shall Tandy Corporation be responsible for any problems caused by the use of this information.

All articles which do not include a by-line came from Computer Customer Service.

DT-100 SERIAL TO PARALLEL CONVERTER (26-1198) - LOCAL PRINTING

Local printing using a Serial to Parallel Converter and a DT 100 Data Terminal is only possible when using an 8 bit word length. The converter will not function properly when using the DT-100 on a system requiring a 7 bit word length.

(IN MARCINIAK & S SPARKS 01-7679)

MODEL 100 MULTIPLAN ROM (26-3829, 01.00.00) - DIFFICULTY LOADING FILES

We have received several reports from customers who are experiencing difficulty loading Multiplan files which they have saved on cassette. "Sound On/Sound Off" seems to affect the problem.

Unlike most files which load more consistently with "Sound Off". Multiplan files on the Model 100 seem to load with better results by entering BASIC and typing "Sound On".

We are still investigating this situation.

(J. WALTER, 01-7679)

PROFILE III PLUS (26-1592. 01.00.00) - TRS-FORMS WIDTH RESET AND RETAINED

A bug has been reported in Profile III Plus. When printing labels and reports, the TRS-FORMS width is reset and retained, thus causing subsequent screen dumps to have the same setting as the last label or report printed. Per Software Engineering, fixing this would require a new release of the program and no new release is planned.

PROFILE III PLUS (26-1592. 01.00.00) - PASSING THE <CLEAR> KEY IN A USER MENU

A sharp 16 year old high school student came up with a way to pass the <CLEAR> key along in a Profile III Plus User Menu (e.g. doing an extended selection for a report).

1. Create the User Menu in the normal fashion. At the point in the User Menu that requires the <CLEAR> key code, put in any character of your choice (the customer used an asterisk '*').
2. Complete the User Menu and exit to TRSDOS Ready.
3. Use the Model III DEBUG Utility program and find the character you put in for the <CLEAR> key and change the hex code to 1F.

NOTE: This procedure is not supported by Radio Shack.

(BILL SHETTLE, STORE #11-7279)

BUSINESS GRAPHICS ANALYSIS PAK (26-4550. 01.00.00) - LINEAR AND QUADRATIC TRENDS

The linear and quadratic trends computed by the program are done by regressing (linear regression) the data on time. In the case of a linear trend, the equation looks like this:

$$\text{Trend} = A + Bt, t = 1,2\dots$$

A and B are regression coefficients and t = period number

In the case of a quadratic trend (an example is the parabolic quadratic graph found under the Line graph menu, "Transform data trends"), the equation would look like this:

$$\text{Trend} = A + Bt + Ct^2, t = 1,2\dots$$

A, B and C are the regression coefficients and t = period number

UNIFY (26-6415. 01.00.00) - 'C' LANGUAGE INTERFACE DOCUMENTATION CORRECTION

The 'C' Language Interface function INBUF returns a -6 instead of a -2 (as is stated in the documentation) when a record is stored. This is per Unify Corp., 3/1/85.

(B OLSON, 01-7679)

DESKMATE (25-1000. 01.00.00) - DATA STORAGE CAPACITY

Tandy has addressed the problem of data storage capacity (or the lack of) on Deskmate by adding the "Swap" command. But unfortunately, MOST customers still do not know how to use this feature, and worst of all many salespersons do not either.

1. Make a self booting back-up of Deskmate.
2. Boot the program.
3. Hit the <FREE> key and take note of the memory left on the disk (not a whole lot).
4. Insert a blank formatted disk in drive B. Hit the F-10 <SWAP> key.
5. Below the function line you will see a message displayed "current: A:/".
type: B <ENTER>

All the current files will disappear, but the main menu remains. When you create a file and save it, it will be saved on the data disk in drive "B". Hit the <FREE> key and OH BOY LOOK AT ALL THAT MEMORY FOR DATA!. Now hit the F-10 key, type:

B <ENTER>

Any new files you created will disappear from the screen, and all the original files will reappear. From MS-DOS you can transfer your current files to the data disk. By following this procedure you now have enough room on your Deskmate disk to install the format and copy commands so that your DOS disk now becomes obsolete (sort of). You may even have room for other commands should you require them.

(FRANCIS A. STANISCI, STORE #01-3662)

TANDY 1000 PFS:GRAPH (25-1143. 01.00.00) - WITH DMP PRINTERS

Graphs will not print properly (i.e. prints garbage) if the line "DEVICE=LPDRV.R.SYS" is in the config.sys file executed on boot-up. This driver (LPDRV.R.SYS) is a printer driver for LP series printers and is incompatible with DMP series printers.

(J. HEVINS, 01-7679)

MAI BASIC FOUR ACCOUNTS RECEIVABLE (26-5213. 01.00.00) - PROGRAM FILE LIST

The capacities of 175 customers and 1750 open invoices stated in the manual is incorrect if a cash basis of accounting is used. These capacities will be clarified in a future version of the program, but to provide some relief, the following is a list of 52 program files that can be copied to drive B. This will allow more space for the G/L Retention file that is created during the use of the cash basis option.
