PRESS ORDER SOFTWARE

EXPRESS ORDER SOFTWARE TANDY 2000 SOFTWARE MEMORY REQUIREMENTS

Most Tandy 2000 Express Order Software programs require a minimum memory of 256K, unless otherwise indicated in the Directory of Reviewed Software. Accounting Partner I (90-0112) requires only 128K on the Tandy 2000. However, EasyWriter I System (90-0115) is listed as requiring only 128K but it actually requires 256K. This discrepancy in the Directory will be corrected.

R:Base 4000 (90-0136), R:Base XRW (90-0138), R:Base Clout (90-0271), and AutoCad (90-0181) all require 384K. Please be aware of these requirements and advise your customers accordingly.

ACCOUNTING PARTNER I (90-0112) - WITH DAISY WHEEL PRINTERS

DO NOT sell the Accounting Partner I for use with Daisy Wheel printers. Daisy Wheel printers do not execute form feeds which are required to use this program.

Due to complications involved in fixing this problem, it is extremely unlikely that this situation will change. Please be aware of this and advise your customers accordingly.

MODEL 4/4P, T/MAKER (90-0272) - CREATING A FILE

Before you can create a file and save it to disk with the T/Maker program, you must do the following:

1. Run TMODIFY.
2. Select Option 2, "Default Characters".
3. Press <ENTER> until you get to the third field, "Default Drive".
4. Enter '1' to set the default drive to Drive 1.
5. Press <ENTER> until you get back to the Menu.
6. Select '99' to save the modified defaults.

You can now create a file and save it to disk without incurring a DISK FULL error message (assuming that your diskette is not FULL).

EXPR' S ORDER SOFTWARE PRODUCT AVAILABILITY

The following is a complete list of EOS 90-series numbers for Computer Software. The date under STATUS is when you can expect TEW to ship a new order.

NOTE: These products are listed in alphabetical order by product title.

T = Tape Program

D = Disk Program

As indicated by the name, "Grapevine", this section is where Customer Service Representatives share information with each other. It is here you can communicate your latest findings and "bits of wisdom" to all CSR's. If you wish to contribute to the CSR Grapevine use the Submission Form attached to the last Update of each month, or send your information to CompuServe ID number 70007,535. Please be sure to include your Name and Store Number.

NOTE: We attempt to separate fact from fiction but not being omniscient we may occasionally goof. If so, let us know about it. We'll gladly correct ourselves.

WARNING: The information contained in the CSR Grapevine is made available on an "as is" basis for the use of store personnel only. Much of the information will not be supported by Computer Customer Service and in no way shall Tandy Corporation be responsible for any problems caused by the use of this information.

All articles which do not include a by-line came from Computer Customer Service.

RSCC/PLUSCC 1985-14 - PROFILE SAVE SCRIPT

The article "Profile 16 - Problem in Save Script" is incorrect as stated. The correct information is:

A problem has been noted in the save script in Profile 16. Sometimes the save appears to put several meg of data on one floppy disk.

In answer to SPR #6412-30, the bug is in the tar program in Xenix 01.03.05. If a tar is used on a large file, and the file begins on floppy #1, then there will not be a problem. If the file is encountered on any subsequent floppies the program will crash. The bug in tar will be addressed in a future version of Xenix. Until then, the user must backup manually. This can be done with:

/bin/tar cfn /dev/fd0 /appl/profile/database/datafile

or you can mount a disk and use the copy command.

(L. WILKINSON. 01-0108)

MODEL 100 MULTIPPLAN (26-3829, 01.00.00) - BOOTING UP AND ACCESSING FILES

When booting up Multiplan for the first time, you may need to clear the memory first. In BASIC, type:

Clear 256, MAXRAM <ENTER>

When using the Disk Video Interface (26-3806) with Multiplan you may need to clear the memory if your Multiplan file will not come up. Enter the BASIC statement listed above and then access the file.

(C. EDGNON. 01-7879)

INVOICE WRITER (26-1544, 02.00.07) - NO OPTION TO PRINT COMPANY NAME/ADDRESS

In Invoice Writer there is no option to print the company name and address on invoices. Problem Report #1544-019 has been filed and answered; this problem will be fixed in version 02.01.00. A temporary way to work around this is to go into Accounts Receivable Maintenance and blank out the company name and address.

(A STINE, 01-7879)

VIDEOTEX PLUS (26-1598, 01.00.00) - PROBLEMS BOOTING ON THE MODEL 4P

Videotex Plus is on TRSDOS 06.00.00 or 06.01.00 which will not boot on the Model 4P. To take care of the problem the Videotex Plus needs to be moved to a later version of TRSDOS. In the example below Videotex Plus will be moved to TRSDOS 06.02.00.

1. Format a blank disk and use it to make a backup of TRSDOS 06.02.00.
2. Place the new TRSDOS 06.02.00 in Drive 0.
3. Type: PURGE :0 (INV,SYS) <ENTER>
and respond to the 'questions' about which files to purge with 'N' (no!) for everything except HELP/CMD and DOS/HLP - respond with 'Y' for these two files. The reason for doing this is to make room for the Videotex programs.
4. Place the old Videotex Plus program disk in Drive 1.
5. Type: BACKUP :1 :0 (NEW,INV) <ENTER>
This will copy the Videotex files on to the disk in drive 0.
6. Remove the old Videotex Plus program disk from Drive 1.
7. With the new copy of Videotex still in Drive 0, type:
SET *CL TO COM/DVR <ENTER>
SYSGEN <ENTER>
This will set COM/DVR for Videotex on BOOTUP - activating the RS232 port.

NOTE: 06.02.00 TRSDOS is not compatible with other TRSDOS versions. Always reset the computer before and after using this program disk.

(TON McCOURT, ATSO #43-0754)

ASSEMBLY LANGUAGE DEVELOPMENT SYSTEM (26-2012, 03.02.00) - ON THE MODEL 4P

The Model 4 Assembly Language Development System running on the Model 4P requires the ROM image file (MODEL/A/III) to be present on the operating system diskette in order to run properly. This file is present on TRSDOS 06.01.02 or greater. You can transfer the ALDS to a TRSDOS 06.01.02 diskette by placing the ALDS disk into drive #1 and executing the following BACKUP command:

BACKUP AL\$/S:1 :0 <ENTER>

The User may also want to copy his source files from the ALDS disk to the System Disk as well.

NOTE: If there is not enough room for the ALDS on the diskette in drive #0 this will not work.

(F McCLOY, 01-7879)

ACCOUNTS RECEIVABLE (26-4504, 02.02.00) - LATE CHARGES IN FRACTIONAL AMOUNTS

Setting up the System Definitions and putting in the desired late charges poses a problem for those wanting to enter a flat amount. The package will only accept a whole dollar amount (i.e. \$5.00). It will not accept any fractional amount (i.e. .97 or 5.50). Problem Report #4504-095 has been filed and answered: The program was designed this way and it will not be changed.

(L. POYTHRESS, 01-7879)

PAYROLL (26-4603, 01.01.00) - MANUAL PAYROLLING PROCESSING

The second screen in Manual Payroll Processing is to be used at all times when entering manual transactions and not just when you need to adjust FICA, Employer FICA, FUI, SUI and supplemental benefits.

(A. STINE, 01-7879)

TANDY 1000 PFS:FILE AND REPORT (25-1140 & 25-1141, 01.00.00) - WITH LP'S

If a line printer is not turned on or is not on line when printing records is requested, the program will show the first screen-full of information, then try to send this information to the printer. It then appears to hang up; if you wait long enough, however, you will eventually get a "Printer Not Ready" error message.

TANDY 1000 PFS:FILE/REPORT (25-1140 & 25-1141, 01.01.00) - NEW VERSION

01.01.00 versions of PFS:File and PFS:Report for the Tandy 1000 have been cut into production. The only difference between these new versions and the old ones is that you have procedures/capabilities for installing the programs onto a hard disk. A 700 upgrade for existing owners will not be offered; instead, the hard disk install scripts for both 1000 programs will be included in FC-0214.

MULTIMATE (26-5330, 03.20.00) - ERROR MESSAGE WHEN CONVERTING ASCII FILES

When using the FILECONV program to convert ASCII files to Multimate the error message "Error: Source File Not Found" will appear even though the source file is on the disk. To work around this error simply try entering the file name again. To correct this error a new release of Multimate is required.

(KEN NOAK, 01-7879)
